This report presents summary statistics on application and registration patterns of applicants wishing to pursue full-time study in first-year places in Ontario universities. This series of annual reports commenced with admissions in the fall of 1973.

To facilitate timely release of these statistics, no commentary has been included in the report.

---

This report was prepared by the Research Division of the Council of Ontario Universities and by the Ontario Universities' Application Centre. Requests for further information should be directed to L.C. Payton, Research Division, Council of Ontario Universities.

## Introduction

This report presents application and registration data for the fall of 1990. The presentation of the data is identical to that used in last year's report. Users are cautioned to read the limitations section of this report to be aware of any factors which might affect the comparability of data in this report, both to earlier reports in this series and to other reports which present registration statistics.

## Definitions

For the purpose of this report, the definitions used by the Ontario Universities' Application Centre have been employed.

*Year 5 applicants* refer to those applicants who were registered during the 1989-90 academic year as full-time day students in the pre-university year at an Ontario secondary school. All other applicants were defined to be *Regular* applicants.

Each applicant was allowed to indicate up to three choices of universities and programmes. Each choice was considered to be a distinct *application*, even though the applicant submitted only one application form. Applicants also indicated their order of preference for their choices.

Throughout the admission cycle, applicants were permitted to amend their choices by dropping a choice and adding a different choice. Deleted choices are referred to as inactive choices or applications while current choices (up to the maximum of three) are called active choices. All of the tables in this report exclude inactive choices.

The Application Centre was responsible for processing all applications for first-year full-time applicants who were not previously registered at an Ontario university. When these applicants subsequently registered at an university, they were designated as *registered applicants*. If a student had been previously registered (i.e. repeater or internal transfer between programmes) at that institution, his application was not processed by the Centre. Data on all students registered in first-year programmes on a full-time basis were provided to the Centre by the universities via the Statistics Canada/MCU USIS/UAR system. Included in these figures were those students who had applied for

advanced standing above first year but had subsequently registered in first year. Where universities did not identify the classification of some of their registrants, these registrants were recorded as unidentified registrants.

Statistics presented in this report deal only with applicants processed by the Application Centre who are applying for fall entry into full-time study in first year of post-Year 5/OAC programmes. In addition to the exclusions listed in the previous paragraph, applicants seeking admission to preliminary year programmes or diploma programmes which do not require Year 5/OAC for entry have been excluded. Table 15 presents a reconciliation of the various categories of registrants in first year.

### General Limitations

As previously stated, the Application Centre received data on registrations indirectly from the universities as part of their annual submission of USIS/UAR enrolment data to Statistics Canada and MCU. In its operations the Application Centre employs a unique set of programme categories; there may not be a direct correspondence between these categories and the programme categories used by MCU and Statistics Canada. Furthermore, there may be instances where a student is reported in one programme to the Application Centre and reported in a different programme to either MCU or Statistics Canada. In addition, statistics showing enrolment in *First Year* from MCU and Statistics Canada may include programmes (e.g., law, medicine, etc.) which are not included in first year as defined by the Application Centre.

Commencing in 1989, Ryerson Polytechnical Institute began processing its applications through the Application Centre; this meant that Ryerson was now included as one of an applicant's three choices. (Prior to this, an applicant could submit three applications to Ontario universities plus an additional application to Ryerson.) As a result, statistics beginning in 1989 are no longer comparable to figures from earlier years and it has been impossible to devise any adjustment factor that would permit valid comparisons. *Readers of this report will have to exercise caution in comparing 1989 and 1990 data to data from earlier years.*

The Ministry of Education renamed the final year of secondary schooling, commencing in 1988. The final year of the old curriculum had been called *year 5* or *grade 13*. Under the new curriculum, students qualify for admission

to university by completing *Ontario Academic Courses* which may be taken prior to a fifth year of secondary schooling. Secondary school students enrolled in these OAC's are now reported as *pre-university*. As a result, secondary school enrolment statistics, particularly in more recent years, may not be comparable to statistics prior to 1988.

1. Ryerson is included for the first time in 1989.

2. Commencing in 1988 the category Year 5 was called Pre-University; the figures also reflect changes in reporting arising from OSIS.
